

```

1      <w:r>
2          <w:t>.</w:t>
3      </w:p>
4  </w:endnote>
5 </w:endnotes>

```

6 *end example]*

7 An Endnotes part shall be located within the package containing the source relationship (expressed  
8 syntactically, the TargetMode attribute of the Relationship element shall be Internal).

9 An Endnotes part is permitted to contain explicit relationships to the following parts defined by this Standard:

- 10 • Alternative Format Import (§11.3.1)
- 11 • Chart (§14.2.1)
- 12 • Diagrams: Diagram Colors (§14.2.3), Diagram Data (§14.2.4), Diagram Layout Definition (§14.2.5) and  
13 Diagram Styles (§14.2.6)
- 14 • Embedded Control Persistence (§15.2.8)
- 15 • Embedded Object (§15.2.9)
- 16 • Embedded Package (§15.2.10)
- 17 • Hyperlinks (§15.3)
- 18 • Images (§15.2.13)
- 19 • Video (§15.2.16)

20 An Endnotes part shall not have any implicit or explicit relationships to any other part defined by this Standard.

### 21 11.3.5 Font Table Part

Content Type:	application/vnd.openxmlformats-officedocument.wordprocessingml.fontTable+xml
Root Namespace:	http://schemas.openxmlformats.org/wordprocessingml/2006/main
Source Relationship:	http://schemas.openxmlformats.org/officeDocument/2006/relationships/fontTable

23 An instance of this part type contains information about each of the fonts used by content in the document.  
24 When a consumer reads a WordprocessingML document, it shall use this information to determine which fonts  
25 to use to display the document when the specified fonts are not available on the consumer's system.

26 A package shall contain no more than two Font Table parts. If it exists, one instance of that part shall be the  
27 target of an implicit relationship in the part-relationship item for the Main Document (§11.3.10) part, and the  
28 other instance shall be the target of an implicit relationship from the Glossary Document (§11.3.8) part.

29 *[Example:* The following Main Document part-relationship item contains a relationship to the Font Table part,  
30 *which is stored as the ZIP item fontTable.xml:*

```

1    <Relationships xmlns="...">
2      <Relationship Id="rId1"
3        Type="http://.../fontTable" Target="fontTable.xml"/>
4    </Relationships>

```

5 *end example]*

6 The root element for a part of this content type shall be fonts.

7 *[Example:*

```

8    <w:fonts ... >
9      <w:font w:name="Calibri">
10        <w:panose1 w:val="020F0502020204030204"/>
11        <w:charset w:val="00"/>
12        <w:family w:val="swiss"/>
13        <w:pitch w:val="variable"/>
14        <w:sig w:usb0="A00002EF" w:usb1="4000207B" w:usb2="00000000"
15          w:usb3="00000000" w:csb0="0000009F" w:csb1="00000000"/>
16      </w:font>
17    </w:fonts>

```

18 *end example]*

19 A Font Table part shall be located within the package containing the source relationship (expressed  
20 syntactically, the TargetMode attribute of the Relationship element shall be Internal).

21 A Font Table part is permitted to contain explicit relationships to the following parts defined by this Standard:

- 22 • Fonts (§15.2.12)

23 A Font Table part shall not have any implicit or explicit relationships to any other part defined by this Standard.

### 24 11.3.6 Footer Part

Content Type:	application/vnd.openxmlformats-officedocument.wordprocessingml.footer+xml
Root Namespace:	http://schemas.openxmlformats.org/wordprocessingml/2006/main
Source Relationship:	http://schemas.openxmlformats.org/officeDocument/2006/relationships/footer

25

26 An instance of this part type contains the information about a footer displayed for one or more sections.

27 A package is permitted to contain zero or one Footer part for each kind of footer (first page, odd page, or even  
28 page) in each section of the document. Each Footer part shall be the target of an explicit relationship in the  
29 part-relationship item for the Main Document (§11.3.10) part, or the Glossary Document (§11.3.8) part.

1 A Extended File Properties part shall be located within the package containing the source relationship  
2 (expressed syntactically, the TargetMode attribute of the Relationship element shall be Internal).

3 An Extended File Properties part shall not have implicit or explicit relationships to any other part defined by  
4 this Standard.

## 5 15.2.12 Font Part

Content Type:	application/x-fontdata application/x-font-ttf
Root Namespace:	not applicable
Source Relationship:	<a href="http://schemas.openxmlformats.org/officeDocument/2006/relationships/font">http://schemas.openxmlformats.org/officeDocument/2006/relationships/font</a>

6

7 An instance of this part type contains a given font embedded directly into the document. (This is useful when  
8 using custom fonts or fonts that are not widely distributed.)

9 Fonts stored in a Font part can be stored in one of two formats, identified by the associated content type:

- 10 • application/x-fontdata specifies that the font shall be stored as a bitmapped font (each glyph is  
11 stored as a raster image)
- 12 • application/x-font-ttf specifies that the font shall be stored in the TrueType or OpenType format

13 A package shall contain zero or more Font parts, and for each that exists, that part shall be the target of an  
14 explicit relationship in the Font Table (§11.3.5), or Presentation (§13.3.6) part.

15 A Font part shall be located within the package containing the source relationship (expressed syntactically, the  
16 TargetMode attribute of the Relationship element shall be Internal).

17 A Font part shall not have implicit or explicit relationships to other parts defined by this Standard.

## 18 15.2.13 Image Part

Content Type:	Any supported image type.	
	[Note: Some example content types are:	
	image/gif	<a href="http://www.w3.org/Graphics/GIF/spec-gif89a.txt">http://www.w3.org/Graphics/GIF/spec-gif89a.txt</a>
	image/png	ISO/IEC 15948:2003 <a href="http://www.libpng.org/pub/png/spec/">http://www.libpng.org/pub/png/spec/</a>
	image/tiff	<a href="http://partners.adobe.com/public/developer/tiff/index.html#spec">http://partners.adobe.com/public/developer/tiff/index.html#spec</a>
	image/pict	<a href="http://developer.apple.com/documentation/mac/QuickDraw/QuickDraw-2.html">http://developer.apple.com/documentation/mac/QuickDraw/QuickDraw-2.html</a>
	image/jpeg	<a href="http://www.w3.org/Graphics/JPEG/">http://www.w3.org/Graphics/JPEG/</a>
	end note.]
